cities have experienced an unprecedented rate of growth in the last decade more than half the world's  
population lives in urban areas with the u s percentage at 80 percent cities have captured more than  
80 percent of the globe's economic activity and offered social mobility and economic prosperity to  
millions by clustering creative innovative and educated individuals and organizations clustering  
populations however can compound both positive and negative conditions with many modern urban areas  
experiencing growing inequality debility and environmental degradation the spread and continued growth  
of urban areas presents a number of concerns for a sustainable future particularly if cities cannot  
adequately address the rise of poverty hunger resource consumption and biodiversity loss in their  
borders intended as a comparative illustration of the types of urban sustainability pathways and  
subsequent lessons learned existing in urban areas this study examines specific examples that cut  
across geographies and scales and that feature a range of urban sustainability challenges and  
opportunities for collaborative learning across metropolitan regions it focuses on nine cities across  
the united states and canada los angeles ca new york city ny philadelphia pa pittsburgh pa grand  
rapids mi flint mi cedar rapids ia chattanooga tn and vancouver canada chosen to represent a variety  
of metropolitan regions with consideration given to city size proximity to coastal and other waterways  
susceptibility to hazards primary industry and several other factors
